Quality Repair...

Knowledge, experience and over 2,200 test fixtures!

G R E S O N

Our mission is to help you maximize your plant's up-time and provide savings. Providing quality maintenance solutions and value added services is just one more way that we achieve this goal.

The cost of replacing PLC's, motion controllers, servo/stepper motors & drives, touch panels and other equipment related to motion control can quickly add up and present a problem or any maintenance or production budget. Added to this can be the cost of production down-time.

Repair it!

Key Features and Benefits:

- Cost savings - 55% over new
- Fast repair turnaround
- Over 5,000,000 repair items pre-priced online
- 2 year warranty on all repairs and Radwell Certified PreOwned items
- FREE evaluation
- No work begins without customer approval
- Total repair management
- No charge for unrepairable units
- All makes and models are accommodated
- FREE detailed work reports included
- Established ESD procedures are strictly enforced
- Meet and exceed all manufacturers specifications
- 24 hour emergency service available

Repair Service Center Flow:

- Repair Entry Team photographs & barcodes unit, scans documents upon arrival for tracking.
- Evaluation team completely reviews unit to determine the proper repair process & testing.
- Customer is contacted with a repair estimate and delivery schedule.
- Upon approval, assigned Technician will test unit and complete repair at industry leading speed.
- Quality Assurance has the final look at all repairs and paperwork. When satisfied, the unit will enter shipping dept. via conveyor belt.
- Shipping automatically assigns the type of customer packaging required.
